VIVA GOLD CORP.

NOTES TO THE INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

January 31, 2020

(Expressed in Canadian dollars)

(Unaudited – Prepared by Management)

1. Nature of Operations and Going Concern

Viva Gold Corp. (“Viva” or the “Company”) was incorporated under the Business Corporation Act (British Columbia) on September 24, 2009. The address of the Company’s corporate office and principal place of business is Suite 302, 8047 199 Street, Langley, British Columbia, Canada, V2Y 0E2.

The Company’s business is the acquisition, exploration and development of precious metal properties. It is currently advancing its 100% owned Tonopah Project, located in the Walker Lane Trend in Western Nevada.

These interim condensed consolidated financial statements have been prepared on the assumption that the Company will continue as a going concern, meaning it will continue in operation for the foreseeable future and will be able to realize assets and discharge liabilities in the ordinary course of business. The Company’s ability to continue as a going concern is dependent upon the ability of the Company to obtain financing and generate positive cash flows from its operations. Viva is an exploration stage company and as at January 31, 2020 had an accumulated deficit of \$5,792,881. Management of the Company does not expect that its current cash position will be sufficient to meet all of its operating requirements, financial commitments, and business development priorities during the next twelve months. Accordingly, the Company will need to obtain financing in the form of debt, equity, or a combination thereof for the next twelve months to continue to operate. There can be no assurance that additional funding will be available to the Company, or, if available, that this funding will be on acceptable terms. These conditions indicate the existence of material uncertainty that may give rise to significant doubt about Viva’s ability to continue as a going concern.

2. Basis of Presentation

Statement of Compliance

These interim condensed consolidated financial statements have been prepared in accordance with International Accounting Standards (“IAS”) 34, Interim Financial Reporting, and based on the principles of International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”). These financial statements should be read in conjunction with the Company’s annual audited consolidated financial statements for the year ended October 31, 2019, which include all of the Company’s significant accounting policies, and have been prepared in accordance with the same methods of application.

These interim condensed consolidated financial statements were authorized for issue by the Board of Directors of the Company on March 25, 2020.

Basis of Measurement

These interim condensed consolidated financial statements have been prepared on an accrual basis and are based on historical costs, modified where applicable. The financial statements are presented in Canadian dollars unless otherwise noted.

Significant Accounting Estimates and Judgments

The preparation of financial statements in accordance with IFRS requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

VIVA GOLD CORP.

NOTES TO THE INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

January 31, 2020

(Expressed in Canadian dollars)

(Unaudited – Prepared by Management)

In preparing these interim condensed consolidated financial statements, the significant judgments made by management in applying the Company's accounting policies and the key sources of estimation uncertainty were the same as those applied to the annual audited consolidated financial statements for the year ended October 31, 2019 except for the adoption of IFRS 16, as described in Note 3.

3. Changes in Accounting policies

IFRS 16 *Leases* sets out the principles for recognition, measurement, presentation, and disclosure of leases. It eliminates the classification of leases as either operating or finance leases required by IAS 17 and introduces a single lessee accounting model.

From November 1, 2019, leases are recognized as a right-to-use asset with a corresponding liability at the date at which the leased asset is available for use. Each lease payment is allocated between the liability and the finance cost. The finance cost is charged to profit or loss over the lease period to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The right-of-use asset is depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis.

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the following lease payments:

- Fixed payments, less any lease incentives receivable.
- Variable lease payments that are based on an index or a rate.
- Amounts expected to be payable by the lessee under residual value guarantees.
- The exercise price of a purchase option if the Company is reasonably certain to exercise that option.
- Payments for penalties for terminating the lease.

Lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be determined, the Company's incremental borrowing rate is used, being the rate that the Company would have to pay to borrow the funds necessary to obtain an asset of similar value in a similar economic environment with similar terms and conditions.

Right-of-use assets are measured at cost comprising the following:

- The amount of the initial measurement of lease liability.
- Any lease payments made at or before the commencement date less any lease incentives received.
- Any initial direct costs.
- Restoration costs.

Payments associated with short-term leases and leases of low-value assets are recognized on a straight-line basis as an expense in profit or loss. Short-term leases are leases with a term of 12 months or less. Low value assets comprise office equipment.

The Company adopted IFRS 16 retrospectively from November 1, 2019 but has not restated comparatives for the 2019 reporting period, as permitted under the specific transitional provisions in the standard. The adjustments arising from the new leasing rules were therefore recognized in the opening balance sheet on November 1, 2019

VIVA GOLD CORP.**NOTES TO THE INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

January 31, 2020

*(Expressed in Canadian dollars)**(Unaudited – Prepared by Management)*

In applying IFRS 16 for the first time, the Company used the following practical expedients permitted by the standard.

- Account for leases with a remaining term of less than 12 months as of November 1, 2019 as short-term leases;
- Apply a discount rate equivalent to the incremental borrowing rate of the Company;
- Account for lease payments as an expense and not recognize a right-to-use asset if the underlying asset is of low dollar value; and
- Use hindsight in determining the lease term where the contract contains terms to extend or terminate the lease

In March 2019, the Company entered into a lease agreement for an office space in Tonopah, Nevada and had accounted for it as an operating lease based on the previous IFRS standards as of October 31, 2019. On November 1, 2019, the Company adopted IFRS 16 standard and recognized this lease as per the new standard. For the purpose of initial recognition of right of use asset and lease liability, the Company used the total commitment amount of \$21,056 (US\$16,000) as at October 31, 2019 and discounted this amount to \$19,632 (US\$14,918) by using a discount rate of 10%, the Company's incremental borrowing rate.

A continuity of the Company's lease liability is as follows:

| FS Presentation- January 31, 2020 | |
|--|---------------|
| Lease Liability | |
| Initial recognition | 19,632 |
| Payments | (3,951) |
| Accretion | 466 |

COVID-19

Since March 2020, several measures have been implemented in Canada, the United States, and the rest of the world in response to the increased impact from the novel coronavirus ("COVID-19"). While the impact of COVID-19 is expected to be temporary, the current circumstances are dynamic and the impact on our business operations cannot be reasonably estimated at this time. We anticipate this could have an adverse impact on our exploration plans, results of operations, financial position and cash flows during the current fiscal year.
